This presentation is for general information only and is not intended to substitute for formal medical training or certification. An independent surgeon, who is not an Intuitive Surgical employee, provides procedure descriptions. The clinical information and opinions expressed in this material about the *da Vinci* System by the participants, including any inaccuracies or mistakes, belong solely to the individual participants. The information and opinions are not necessarily those of Intuitive Surgical, Inc. Intuitive Surgical trains only on the use of its products, such as the *da Vinci Surgical System* and is not responsible for surgical credentialing or for training in surgical procedure or technique. As a result, Intuitive is not able to establish the accuracy of procedural content. While clinical studies support the use of the *da Vinci Surgical System* as an effective tool for minimally invasive surgery, individual results may vary.
